

What is ABM Payments?

ABM Provides best in class EV charging payment processing, offering competitive rates and fees at 2.9% (+1.5% per transaction for international cards). This, along with quality customer service and our easy application process, means we are putting our clients and their customers first. Our platform provides businesses with a suite of tools to process card-not-present transactions for electric vehicle chargers, whether through online or mobile channels. ABM Payments will help you reduce transaction fees, improve payment operations, and enhance customer experience, making it easy and convenient for EV users to pay for charging their vehicles.

Visit Stripe's Website to get started:

1. **Open your browser** and go to <https://www.stripe.com>
2. **Sign Up:** Click on the "Start Now" or "Sign Up" button, usually located in the top right corner.
3. **Provide Email & Details:** Fill in your email address, password, and any other requested details.
4. **Verify Email:** Check your email for a verification message from Stripe. Click the link inside the email to verify your email address.
5. **Setup Your Account:** Once verified, return to Stripe and complete the account setup. This will include business details, bank account information (for payouts), and personal details for identity verification.
6. **Dashboard:** Upon successful account creation, you'll be directed to your Stripe dashboard. From here, you can manage payments, view transactions, and set up integrations.
7. **Connecting Stripe to ABM EV OS:** reach back out to your ABM rep after you have finished setting up your stripe account and we'll connect it for you

Why do I need a payment processor?

A payment processor is necessary to accept card payments for EV charging services in a secure PCI compliant environment. By accepting credit card payments through a partner like ABM, EV charger owners can offer a convenient and reliable payment method to their users, ensuring a smooth and hassle-free charging experience.
