

# SIX STEPS TO EV CHARGER SUCCESS

ABM experts deliver a step-by-step program to bring EV charging to your facility. We handle implementation, so you can focus on your business.

1

## Facility review and report

- 360° approach focused on facility needs
- Parking capacity study, and electrical load and switchgear analysis
- Compliance and regulatory due diligence

2

## EV project map

- Optimal number and type of chargers
- Identify any needed electrical infrastructure enhancements
- Project timeline and future-proofing recommendations

4

## Installation and product training

- Self-performed installation ensures quality
- In-person training on intuitive software and hardware

3

## Financing and source capital

- Minimize CapEx with financing options
- Identify all available local, state and federal grants and rebates

5

## Ongoing dedicated support and service

- Maintain uptime with preventive maintenance and fast, warranty-backed repairs

6

## Continuous guidance and forecasting

- ABM provides trends and insights to keep up with EV market growth and changes in charging technologies and regulations

As the leading commercial installer of EV chargers in the U.S., ABM has helped facilities nationwide implement EV strategies for sustained success.
