ABM®

Post-Billing

Simplify Payments and Enhance Customer Experience

Overview

Based on pre-set billing cycles, registered members receive an invoice for their usage or energy consumption, usually monthly.

Key Features

- Access billing and revenue management, providing analytics for pricing, marketing, promotions, and customer care.

- Minimize fees by eliminating the transaction fees charged by the payment gateway provider.

- Encourage usage and increase ease.

- Capture customers with different payment preferences.

Usage

Unlock a new level of convenience and customer satisfaction with our cutting-edge payment system. By allowing users to charge first and pay at the end of each month, we provide a familiar and seamless experience. Our system generates detailed reports of accumulated charging expenses, simplifying monthly payments for residents and members. Whether you manage residential buildings or office parks, this system is a game-changer, enhancing user experience and streamlining payment processes. Furthermore, as a charging network operator, you can offer your enterprise clientele a fully customizable charging service, including the option of post-billing.
