How EV Parking Supercharges Airports

01

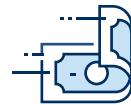

Provides a premium passenger experience

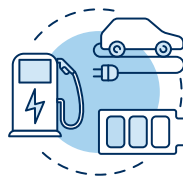

Airport EV charging appeals to potential customers by delivering the charging needs of both long and short-term parking visitors and employees, all while providing a world-class experience for modern drivers. ABM offers both L2 and DC Fast Charge options to fit your airport's (and your parkers') needs.

02

Creates a new non-aeronautical revenue stream

If you currently offer complimentary EV chargers (or no chargers at all) you're missing out on a valuable revenue opportunity. Today's charging technology offers easy integration into new or existing parking software to provide an additional revenue stream. Plus, any underutilized garage or surface lot can become profitable.

03

Shows your commitment to eco-friendly practices

EV charging not only helps improve air quality by decreasing carbon emissions, it shows your airport's commitment to achieve sustainability goals by meeting the increasing needs of electric vehicle owners. Additionally, it enhances the public's perception of your facility and lets visitors see your airport operates as a good corporate citizen.

04

Provides a modernized, seamless parking experience

With ABM's end-to-end parking management technology, your parking operations can be integrated at all points: from entry to exit, valet to self-parking, for transient and credentialed customers alike. We offer real-time booking and billing as well as ongoing parking management software to transform data into actionable insight.

Recharge Your Parking Program with ABM

ABM's extensive experience in parking management and energy-saving solutions offer airport parking operators a knowledgeable partner across several evolving industries. ABM's large network of professionals are uniquely positioned to implement custom EV charging projects, providing multiple services from one trusted source. Whether you are looking to start your first EV charging project or enhance your current EV charging offerings, ABM's turnkey solutions can be tailored to your needs.

-  **20,000+ charging ports in North America**
-  **Solar and battery storage**
-  **Brand agnostic EV charging**
-  **Full EV infrastructure capabilities**
-  **National service and maintenance**
-  **Active load management**
-  **Fleet electrification**
-  **Vehicle to grid charging**
-  **Smart parking**
-  **Level 2 and DC fast charging**
-  **Power management**

 INCREASE REVENUE Monetize your EV charging to cover costs and generate profit.	 REDUCE COSTS Replace on-site fleet with low-maintenance, less expensive to fuel electric vehicles.	 IMPROVE EFFICIENCY Solar-powered devices, active load management, and mobile technology integration available.
---	---	---

From planning to installation, monetization to management, ABM can jumpstart an EV charging program at your airport.
